Profiles	<div><div><div><div></div></div><div>heygema</div></div><div><div><div></div></div><div>heygema</div></div></div>	
Summary	<p>A Software engineer with experience on end product, system, and database architecture. My passion lies in crafting performant UX and developer-friendly APIs. I'm always driven to ship high-quality results.</p>	
Experience	<div><div><div><div>Kodefox.com</div><div>2018-03-01 - Present</div></div><div>Software Engineer</div><div><div><div></div></div>https://kodefox.com</div><div>A software agency building applications for web and mobile apps.</div><div><div>- My day to day includes Developing the web/mobile application based on clients business requirements</div><div>- Writing unit tests/using e2e testing framework cypress (TDD)</div><div>- Training & onboarding new engineers on Kodefox's Internal Bootcamp</div></div><div>Skills: Next.js · Prisma ORM · React.js · Node.js · TypeScript</div></div></div>	
Projects	<div><div><div><div>Kodesk (Kodefox)</div><div>2023</div></div><div>HR Management App</div><div><div><div></div></div>https://kodesk.io</div><div>HR management application streamlining employee operations, time tracking, and workforce scheduling for modern businesses.</div><div><div>Key Contributions:</div><div><div><div>• State Management Optimization: Migrated from React Context to Jotai atomic state management, reducing component re-renders by 80% and improving app performance by 45%</div><div>• Time Tracking System: Developed end-to-end time tracker feature including backend API and frontend interface, enabling accurate tracking of employee work hours with real-time synchronization</div><div>• Schedule Management: Built interactive schedule grid component</div><div>• Backend Development: Implemented robust APIs for schedule management and time tracking</div><div>• Code Quality Enhancement: Eliminated props drilling throughout the application, reducing component coupling by 70% and improving maintainability for development team</div><div>• Performance Optimization: Reduced bundle size by 30% and improved page load times by 50% through code refactoring and efficient state management</div></div></div><div>React, Jotai, Node.js, TypeScript, Express, Redis, Docker</div></div></div><div><div><div><div>Akyrian (Kodefox)</div><div>2021</div></div><div>Web Application</div><div><div><div></div></div>https://akyrian.com</div><div>Clinical research application managing R&D workflows for healthcare professionals studying patient data through secure data entry and authorized review chains.</div><div><div>Key Contributions:</div><div><div><div>• Database Architecture: Designed scalable PostgreSQL database schema according to clinical requirements</div><div>• Performance Optimization: Reduced UI component load times by 65% through code splitting and lazy loading implementation</div><div>• Grid Rendering Enhancement: Optimized large data grid performance by eliminating unnecessary state updates, reducing render time from 3.2s to 0.8s (75% improvement) and improving hover responsiveness by 85%</div><div>• Full-Stack Development: Built responsive frontend interfaces and RESTful APIs, delivering 4+ core features including patient data management, review workflows, and audit log</div><div>• Data Integrity: Implemented robust validation systems ensuring 99.9% data accuracy across clinical research protocols</div></div></div><div>React, PostgreSQL, Express, Typescript, GraphQL</div></div></div><div><div><div><div>TVIP (Kodefox)</div><div>2019</div></div><div>E-commerce Platform</div><div>Custom e-commerce solution for Aqua and Vit specialized in galon water delivery and premium beverage products, serving both B2B and B2C markets.</div><div><div>Key Contributions:</div><div><div><div>• Database Design & Architecture: Designed comprehensive database schema using Prisma ORM, supporting 2,000+ products, order management, and multi-vendor inventory tracking across 10+ distribution centers</div><div>• Backend Development: Built scalable Node.js backend infrastructure with 99.8% uptime and sub-200ms API response times</div><div>• GraphQL Implementation: Developed type-safe GraphQL API with 40+ queries and mutations, reducing data over-fetching by 60% and improving mobile app performance</div><div>• Admin Dashboard: Created responsive web dashboard for inventory management, order tracking, and analytics, reducing manual processing time by 70% for operations team</div><div>• Technical Documentation: Authored comprehensive API documentation and integration guides for mobile development team, accelerating mobile app development by 3 weeks</div><div>• Order Processing: Implemented automated order workflow system processing galon deliveries with real-time tracking and scheduling optimization</div></div></div><div>Node.js, Prisma, GraphQL, React, PostgreSQL, TypeScript</div></div></div><div><div><div><div>Comdash (Kodefox)</div><div>2018</div></div><div>Sales & KPI Dashboard</div><div>dashboard providing real-time business intelligence and data visualization for Sampoerna's operational metrics and KPIs.</div><div><div>Key Contributions:</div><div><div><div>• Data Visualization Widgets: Developed 15+ interactive chart widgets including line charts, bar graphs, pie charts, and heat maps, displaying complex business metrics for 500+ daily active users</div><div>• Performance Optimization: Optimized chart rendering for large datasets (10,000+ data points), improving load times by 65% and eliminating UI freezing during data updates</div><div>• Responsive Design: Created mobile-responsive dashboard components ensuring consistent user experience across desktop, tablet, and mobile devices with 95% cross-browser compatibility</div><div>• Custom Chart Library: Built reusable chart component library with 8+ chart types, reducing development time for new widgets by 40% and ensuring design consistency</div><div>• Data Processing: Implemented efficient data aggregation and filtering systems, handling 1M+ data points with sub-second query response times</div></div></div><div>React, SPA, HTML, Javascript, Chart.js</div></div></div></div></div></div></div>
