in heygema

I have a working experience in several greenfield projects and maintaining older codebases. Architect the system and database. My inclination is toward crafting the frontend with focus on accessibility, polished *UI* and fine grained *API* for *DX*. Prefer *Declarative over Imperative*. Always shipping.

---

## WORK EXPERIENCE

### Kodefox.com
(March 01, 2018 - Present)

Software Engineer

A software agency building applications for web and mobile apps.
Responsibilities:

- Develop the web/mobile application based on use cases & requirements

## EDUCATION

### FreeCodeCamp

Certificate

🔗 https://freecodecamp.com

## SELECTED PROJECTS

### Akyrian
(August 25, 2021 - May 25, 2023)

Web Application

clinical research application which manages the flow of R&D being used by doctors and nurses to study patients using robust data entry and chains of authorized review.

- I help with expanding the database based on new requirements (BE)
- reducing load time by refactoring previous css styling implementation (FE)
- refactoring slow components by making more efficient states that utilizing memoization and avoiding previous versions slow down caused by unnecessary rendering. (FE)
- I help created the entire apps Audit Log system.
